            title('Cos(x+pi/2) plot')
            plot(x, np.cos(x+math.pi/2), color = 'g')
```

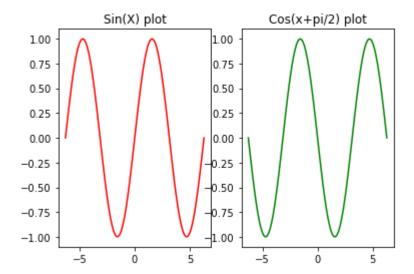

Part 2: 2D Plot

- 1. Create a line plot of $\sin(x)$ and $\cos(x + \pi/2)$ for $-2\pi < x < 2\pi$ where x i ncreases at intervals of $\pi/4$.
- i. Make the $\sin(x)$ graph red and make the $\cos(x+\pi/2)$ graph green, Put both lines onto the same plot

ii. Using the same info as above, make a subplot with 2 different graphs- o ne graph for $\sin(x)$ and one graph for $\cos(x+\pi/2)$

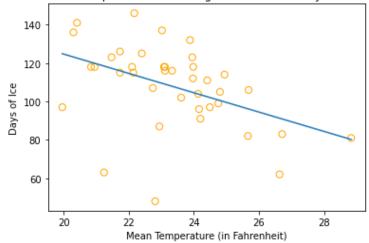

Out[9]: [<matplotlib.lines.Line2D at 0x2052e839d60>]

2. Scatter Plot:

Using the following data about winter temperatures affecting the number of days for lake ice at Lake Superior, construct a scatter plot to display the data. Include a line of best fit.

Scatter plot to show winter temperatures affecting the number of days for lake ice at Lake Superior
